DETAILED ACTION

Response to Amendment

1. The present Office action is made in response to the amendment filed on 11/7/2008. It is noted that in the amendment, applicant has made changes to the specification and the claims. Regarding to the claims, applicant has amended claim 1 and canceled claim 3. There is not any claim being added. The remaining claims 1-2 and 4 are examined in this Office action.

Specification

2. The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

EXAMINER'S AMENDMENT

3. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

In the claims:

a) In claim 1: on line 4, changed "(2, 3, 4)" to -(2, 3, 4')--; and on line 8, changed "Triplet" to -triplet--.

b) In claim 4: on line 1, changed "an" to -the--.

Allowable Subject Matter

4. Claims 1-2 and 4 are allowed.
5. The following is an examiner's statement of reasons for allowance:

The relay set as recited in the independent claim 1 is patentable with respect to the prior art, in particular, the U.S. Patent Nos. 4,693,568 and 5,461,509 by the limitations related to the structure of the lens elements constituted each of the half set of the relay set. It is noted that while the use of a triplet in each of the half set of a relay set in an endoscope is known to one skilled in the art as can be seen in each of the mentioned reference; however, the cited art does not disclose the lens structure of each half set as recited in present claim 1, lines 8-16. In particular, the half set of the relay set as described in the Patent No. 4,693,568 and shown in fig. 2 does not disclose that the outer lens component is a cemented lens constituted by a plane-convex lens and a plane-concave lens. In the Patent No. 5,461,509, the half set of the relay set as described in column 2 and shown in figure 3 discloses a cemented lens constituted by a plane convex lens and a plane-concave lens; however, the outer lens is a plane-concave lens with a negative power and the middle lens is a plane-convex lens with a positive power. Both the two mentioned Patents do not disclose that the half set comprises an inner positive lens, a middle negative lens and an outer positive lens wherein the outer positive lens is a plane-convex lens, the middle lens is a plane-concave lens element and the outer lens and the middle lens are cemented to each other as claimed.

Art Unit: 2872

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
